June 14, 2010 (data through previous Friday close)

Volume 1

Issue 23

Bottomed

So far, so good. The stock market is holding at its previous lows. In fact, there's a major positive divergence that is now in place. Last week, the Industrials closed below their lows of early February. The Transports held above them. From that day the market rallied.

So, at this stage I would not expect the Industrials to trade below 9900 for the next few months. In fact, the market should climb the wall of worry back up to recovery highs.

But, it is on that rally to recovery highs that we need to watch for the reverse of what just happened.

Coming into this correction, the market was in gear to the upside. As it fell, investor sentiment worsened markedly. But the fundamentals remained fairly unchanged. What did

(Continued on bottom right on page 6 see REVIEW)

The chart shows the daily S&P 500 with red smoothed line an 80-day moving average and orange line a relative comparison to the bond market. The lower part shows blue volume and red spikes as possible trading signals.

WEEKLY REVIEW and PREVIEW

No changes this week.

Income Charts

PHB—high yield ETF.

Given a stock market recovery, it should be accompanied with a break-out to the upside with the high-yield market.

BSV

Each chart shows daily prices (top portion), volume (bottom portion), a moving average (smoothed red line on price portion, a relative strength indicator between the ETF and AGG (Aggregated bond ETF) (orange line), and red spikes. The spikes show potential places to buy and sell short. If the moving average is trending down, the spike shows a potential sell shorts. If the moving average is trending up, the spike shows potential buys. The charts do not show selling or covering signals.

WEEKLY REVIEW

Buy ILF (Latin America) as noted above. This brings the Portfolio to about 68% invested and 32% cash (money market).

See performance rankings of the equity oriented ETFs on page six.

Growth Charts

FXI-China

Broken its downtrend and outperforming the SPY.

The trend is up.

ILF

That is what is called a waterfall decline.

ILF has now bottomed and should recover the fall.

DBC—Commodity

Still watching for a rally back to the mid twenties.

Each chart shows daily prices (top portion), volume (bottom portion), a moving average (smoothed red line on price portion), a relative performance indicator between the ETF and S&P 500 (orange line), and red spikes. The spikes show potential buy and sell short signals. Generally speaking, it the moving average is trending down, the spike shows a potential sell short. If the moving average is trending up, but the ETF declines, the spike shows a potential buy. The charts do not show selling or covering signals.

The two columns to the left show the rankings of the equity oriented ETFs in our database through the previous Friday's close.

These rankings are based on momentum indicators around which we generally want to trade. Our general strategy is to invest with the stronger performing ETFs by investing with the main trend and against the minor trend down. This means that in a bear (down) market, we want to short the funds that rally against their main trend downward. In a bull market, we want to buy during selloffs with the main trend up.

(Continued from page 1) REVIEW

change was the perception of risk; it was fear that drove the market lower, rather than fact.

So, on the current rally, we should expect the market to recover over the summer. Then I would expect a negative divergence to develop where one index hits a recovery high, but the other doesn't. From there, it should enter a correction or new bear market for 2011-2012.

In the meantime, the market appears to have hit bottom and is now on its way back up.

Descriptions & Disclosures

PORTFOLIO DESCRIPTIONS (pages 2 and 3)

Our guiding goal is to provide the most return with the least risk consistently over time through bull and bear markets.

Income Portfolio, page2: Uses a proprietary selection methodology on all of the monitored bond-oriented ETFs to pick the top ETFs. I then use a proprietary timing model to decide whether to buy, sell, hold, or avoid.

Growth Portfolio, page 3: Uses the same methodologies as in the Income Portfolio, except as it is applied to stock-oriented ETFs.

All portfolios were started on 1/1/10 with \$100,000.

Portfolio changes will usually be made at the close on Monday, unless otherwise noted in any emailed hotline update. Issues are normally posted on Mondays by 1:30pm cst.

Portfolios are updated through the Friday close the week before.

Dividends are reinvested in additional shares. Commissions of \$5/trade and short-term redemption charges, if any, are applied. Interest is zero for the money market (cash) position.

SUBSCRIPTIONS: To receive *ETF Selections & Timing*, you may subscribe in one of three ways. You may subscribe on the web site InvestmentST.com using PayPal or call 1-800-800-6563 for Visa or MasterCard orders or send a check to the address on the front page. Subscriptions may be tax deductible.

The recurring monthly subscription is \$24.00. An annual subscription is \$240.00. Subscribers receive this weekly eNewsletter. There is no mailed issue. Subscribers retrieve the current weekly issue at the web site InvestmentST.com by logging in using a log in name and password.

Unless otherwise noted, the weekly eNewsletter is posted by 1:30 PM central time each Monday, except for holidays and then on Tuesday. It may contain actionable, specific buy or sell advice to take that day at the Monday close in each portfolio. Portfolio data will be updated through the previous Friday's close. Fund symbols, rather than names, are the official identification used for activity.

GUARANTEE: Subscriptions may be cancelled at any time. Annual subscriptions are refundable for the weekly term remaining with a four-week minimum charge, using a 52-week count. Monthly subscriptions just expire.

PUBLISHER: Watercourse Way Holdings, LLC publishes this newsletter.

REPRINTS: This eNewsletter is intended for subscribers only, reprints are not permitted.

DISCLAIMER: The information contained herein is assembled from sources who are believed reliable, but the accuracy of data or advice cannot be guaranteed. Past performance does not guarantee future performance. Portfolio values include a commission of \$5/trade, dividend reinvestment, and short-term redemption charges. The Wilshire 5000 is a broad based equity index and may or may not be useful in comparing returns. Security values fluctuate. Information is provided without consideration for your personal situation.
