A Sense of Urgency?

Thanksgiving has come and gone. (The smoked turkey was again excellent by the way.) Congress too vacationed, but is now back in session. If I read my calendar right, there's another holiday coming up. What shall we bet that Congress will also observe

it, rather than taking the time to address the Fiscal Cliff? Urgency? Apparently not.

Maybe it is for the best for them and us to not kick the can down the road again. Take the month off. When you go over the cliff, after all, there is no road. No escape hatch, but ra-

ther an intense focusing on the here and now with a bit of here-after thrown in.

They have to do something about the structural deficits. They have to do something about wasteful spending. Tough

(Continued on bottom right on page 12 see REVIEW on top)

This is the daily chart of the Dow Industrials (top) and Transports (bottom).

WEEKLY REVIEW

11/26 No changes.

11/19 Given the Fed will buy mortgage-backed securities, it's a wonder MBB hasn't moved up.

11/12 No changes.

11/5 No changes.

10/30 No changes. I still expect yields to remain stable to down in the months ahead.

10/22 I'll sell the short-dated corporate bond BSV and buy the 10-20 year Treasury TLH.

10/15 Treasuries appear to be bouncing. See charts on the next pages.

	2010	2011	ytd 2012	Incptn	SD
ETF Income Portfolio	4.8%	3.6	5.0	14.1	3.2
Aggregate Bond	2.5%	4.3	1.6	8.5	2.2

This shows the returns of previous years, year to date (ytd), and from inception (incptn). It also shows standard deviation (SD).

This is the ETF Income Database and Ranking. It shows performance over the last 12, 9, 6, 3, and 1 months through the previous month's end. V is Volatility. NAV is price. CS is Comet Strength (not shown). C is Comet (not shown), which is an ETF's risk-adjusted performance; the higher the better. V, CS, and C are proprietary tools. Rank column shows the number of comets.

ETF LEGEND for pages 3 (Bond), and 7, 8, 9, and 10 (Equity):

Column headings: The first column shows the ETF name, the second column shows its symbol (due to our data provider, symbols may end in a "D"; it should be ignored). The third column shows the ETF Style. The first letter is always either B (Bond) or E (Equity) or H (Hybrid). The next letter(s) is the style. So, BS-bond short, BI-bond intermediate, BL-bond long, BF-flexible, BW-world, BH-high yield. And for Equity, EA-equity aggressive, EC-equity contrary, EG-equity gold (precious metals), ESC-small cap, EMC-mid cap, ELC-large cap, EW-world, EGI-growth/income, ERE-real estate, EV-value.

Columns 4-8 show percentage returns for the periods shown (12 months, 9, 6, 3, and 1 month). Column 9 is V (volatility); a measure of risk; the lower the less risk. Column 10 is the NAV. Column 11 is the C (comet) ranking. C is the risk-adjusted (V) relative performance (CS-not shown). The higher the C indicates the most return for the amount of risk taken.

Generally, our ETF strategy is to own the top ranked ETFs (shown in green) and avoid or short the lower ranked ETFs (shown in red).

SLM Bond Timing Model

The SLM Bond Timing Model is based on the expected direction of the Corporate Bond market. The green bars are bullish (expect higher prices and lower yields) and the red bars are bearish (expect lower prices and higher yields). White spaces indicate that the previous signal is still in effect.

WEEKLY REVIEW

11/26 Although the Bond Timing Model (based on Corporates only) went on a sell signal (shown in red above), I have noted before that in this ongoing secular bond bull market, these sell signals have really been fairly good entry areas to buy or buy more. So, if you're looking to buy, this looks to be a good time. If you're already invested, holding is warranted. If you're leveraged, though, it would be a time to lighten up. The Treasury market has been playing catch-up to the Corporate market.

11/19 Trend up continues.

11/12 Catch up apparent.

11/5 No changes.

10/30 If the previous analysis is correct (weak Treasuries will play catch-up to stronger corporates), then it's only a matter of time before the down trend line drawn on the chart is broken to the upside.

10/22 I'll buy the Treasuries on their relative weakness to corporates; this is shown on page 2.

Income Charts

LQD—Invtmnt Grd Corporate

11/26 Still bullish. Good entry area (see page 4)
 11/19 Pullback within a bull market.
 11/12 Pullback within a bull market.
 10/30 No changes.
 10/22 No changes.
 10/15 Rally on.

TLH—10-20 year Treasuries

11/26 Still bullish.
 11/19 Jump through downtrend line is bullish.
 11/12 Rally.
 10/30 Good entry area.
 10/22 Buying on the pullback, expecting higher prices.

JNK—high-yield bonds

11/26 Monitoring.
 11/19 Getting closer to major support.
 11/12 Pullback.
 10/30 Watching for a significant pullback. (gold bars)
 10/22 No comment.

MBB—mortgage backed

11/26 At major support and needs to rally to confirm.
 11/19 Correction down to major support.

Each chart shows daily prices, a moving average (smoothed red line on price portion), and spikes. The spikes show potential buy and sell short signals. Generally speaking, if the moving average is trending down, the spike shows a potential sell short. If the moving average is trending up, the spike shows a potential buy. The charts do not show selling or covering signals.

WEEKLY REVIEW

11/26 As shown on page 1 in the scoreboard, I've changed the comparison index from the Wilshire 5000 Total Return to the World Growth Index, which is made up of 20% each in five ETFs (EEM, EFA, IWM, QQQ, SPY). The numbers below will be changed. In addition to the stops built into the new model is the obvious timing model itself. It has now turned bearish and it is time to sell. The World Growth Model is designed to be either fully in or fully out. So on this sell signal, we are out. On the next buy signal, I anticipate moving fully in. The alternative to that will depend on the completion of the new Top ETF Growth Model. It too will be fully in or fully out. The timing models will be the same, but each timing model is based on the ETFs. So, the top ETFs could be still rising, while the World Growth Index is declining. More details in a brochure is planned.

11/19 No changes.

11/12 SPY was stopped out. Just a quick note on these stops.

11/5 No changes.

10/30 IWM stopped out.

	2010	2011	ytd 2012	Incptn	SD
ETF Growth Portfolio	8.1%	6.9	-1.8	13.4	5.7
Wilshire 5000 TR	17.7%	0.5	NA	NA	10.9

This shows the returns of previous years, year to date (ytd), and from inception (incptn). It also shows standard deviation (SD).

This page shows the top ranked ETF Growth Database. It shows performance over the last 12, 9, 6, 3, and 1 months through the previous month's end. V is Volatility. NAV is price. CS is Comet Strength (not shown). C is Comet, which is an ETF's risk-adjusted performance; the higher the better (not shown). This gives us the Rank column (shown).

Generally speaking, we want to own the top-ranked ETFs with 5 and 4 comets. (Comets, not stars, because unlike stars that are fixed, comets come into and out of prominence. We want our thinking, our metaphor aligning with reality.

This shows the ETF Growth Database and Ranking. It shows performance over the last 12, 9, 6, 3, and 1 months through the previous month's end. V is Volatility. NAV is price. Rank shows the number of comets from 5 to 1. The larger the better.

SELECTED LONG SHORT ETF CHARTS

XLU—utilities

11/26 Ledge or bottom of the cliff?
11/19 Fiscal Cliff fallout.

IWM-Russell 2000

11/26 Bounce to resistance.
11/19 Oversold.
11/12 Buy the pullback.

DVY

11/26 Bounce to resistance.
11/19 Fear of Fiscal Cliff led to sell off.
11/12 The assumption behind the sell off in dividend type stocks is that their tax preference will change.

QQQ

11/26 Bounce to resistance.
11/19 Oversold.
11/12 Oversold. Time to reenter.
10/22 Stopped out on weak pullback.

Overflow from Page 1, Definitions, and Newsletter Updates

(Continued from page 1) **REVIEW**

to believe that with a trillion dollar budget that they can't find 10% (\$100 million) in savings anywhere. How about across the board?

The rest of the country, both citizens and states, as well as corporations have tightened the belt a bit, got their fiscal houses in order. Why shouldn't the federal government do the same? It should, even if it can print unlimited (or borrow from the printer-

aka Federal Reserve) quantities of money.

Until the issue is resolved one way or the other, volatility should be expected through year end. It's the uncertainty that drives the market lower, as well as the good possibility of a recession in next year's first half.

Last week I mentioned the market was oversold and a bounce expected. We got the bounce; we're in it. It has put us back to resistance where selling

should be expected.

Please see the specific portfolio pages for changes.

Just to clarify a couple of terms that I use regularly.

Short-term is days to weeks.

Intermediate-term is weeks to months.

Long-term is months to years.

Cyclical is 1-5 years.

Secular is 5 years to decades.

Bull market is a series of higher highs and higher lows.

Bear market is a series of lower lows and lower highs.

Neutral market is sideways without a discernible pattern.

Oddly, bull and bear markets may occur simultaneously, but only over different time periods. For example, we may be in a secular bear market, but there are cyclical bull and bear markets within that.

Closing stops are "mental". I look at the position at quarter to the close. If it is trading below the stop (or above if short), then I act with the assumption the security will trigger that closing stop on that day. I sell (or cover) at the close that day.

New portfolio stops are being implemented. These are internal and will be emailed if triggered.

11/26 World Growth Index introduced. It is made up of 20% of EEM, EFA, IWM, QQQ, and SPY.

11/19 No changes.

11/12 Portfolio stops (in addition to specific ETF stops) are being implemented. These will be emailed for action the next day, if triggered.

11/5 ETF rankings by C (comet) through 10/31/12 are shown. ETF LEGEND is new on page 3.

Descriptions & Disclosures

PORTFOLIO DESCRIPTIONS (pages 2 and 6)

Our guiding goal is to provide the most return with the least risk consistently over time through bull and bear markets.

Income Portfolio, page2: Uses a proprietary selection methodology on all of the monitored bond-oriented ETFs to pick the top ETFs. I then use a proprietary timing model to decide whether to buy, sell, hold, or avoid.

Growth Portfolio, page 6: New selecting and timing model is nearing completion.

Both portfolios were started on 1/1/10 with \$100,000.

Portfolio changes will usually be made at the close on Monday, unless otherwise noted in any emailed hotline update or triggered stop orders. Issues are normally posted on Mondays by 1:35pm cst (Tuesday if Monday is a holiday).

Portfolios are updated through the Friday close the week before.

Dividends are reinvested in additional shares. Commissions of \$10/trade and short-term redemption charges, if any, are applied.

Interest is zero for the money market (cash) position.

Wilshire 5000 TR (total return) includes dividend reinvestment. This is a broad based index of domestic stocks.

SUBSCRIPTIONS: To receive *ETF Selections & Timing*, you may subscribe in one of three ways. You may subscribe on the web site InvestmentST.com using PayPal or call 1-800-800-6563 for Amex, Visa, MasterCard, or Discover orders or send a check to the address on the front page. Subscriptions may be tax deductible.

The recurring monthly subscription is \$24.00. An annual subscription is \$240.00. Subscribers receive this weekly eNewsletter. There is no mailed issue. Subscribers retrieve the current weekly issue at the web site InvestmentST.com by logging in with a user name and password.

Unless otherwise noted, the weekly eNewsletter is posted by 1:35 PM central time each Monday, except for holidays and then on Tuesday. It may contain actionable, specific buy or sell advice to take that day at the Monday close in each portfolio. We may also use stop orders. For stops, check the ETF at quarter to the close. If it is below (or above) a stop level, assume it will close there and act on that. Portfolio data will be updated through the previous Friday's close. Fund symbols, rather than names, are the official identification used for activity.

GUARANTEE: Subscriptions may be cancelled at any time. Annual subscriptions are refundable for the weekly term remaining with a four-week minimum charge, using a 52-week count. Monthly subscriptions just expire.
