Issue 49

Scenarios

he jobs report this month came in stronger than expected. Unemployment dropped to 7%, the lowest level since November 2008. Will it be enough for the Fed to announce the beginning of its taper program? We'll find out soon enough at the next Fed

meeting on December 17-18.

One scenario is that the economic numbers are strong enough to move the taper needle, but the current chairman may still want to do nothing. His term expires January 31 2014 and Janet Yellen will begin her term. Why not let his prede-

cessor take over "as is"?

If that scenario plays out, then bonds may start to rally. See page 2.

To be clear, however, I believe the 30-year secular bond bull market is over. So, bonds

(Continued on bottom right on page 12 see REVIEW on top)

WEEKLY REVIEW

- 12/9 We were stopped out of the AGG position, but we'll get back in with another close stop. We will also buy PCY with a close stop.
- 12/2 As noted on page 5, PCY is potentially setting up for a reversal. I will buy if it closes back above \$26.90 this week. If it doesn't, continue to stand aside.

Watch the close stop on AGG. The economy may be much stronger than expected.

- 11/25 Partially reentering the bond market using AGG, as noted above.
- 11/18 The bond market is bouncing off its oversold condition. Will wait for reentry signals.
- 11/11 No changes.

This is the ETF Income Database and Ranking. It shows performance over the last 12, 9, 6, 3, and 1 months through the previous month's end. V is Volatility. NAV is price. CS is Comet Strength (not shown). C is Comet (not shown), which is an ETF's risk-adjusted performance; the higher the better. V, CS, and C are proprietary tools. Rank column shows the number of comets.

ETF LEGEND for pages 3 (Bond), and 7, 8, 9, and 10 (Equity):

Column headings: The first column shows the ETF name, the second column shows it symbol. The third column shows the ETF Style. The first letter is always either B (Bond) or E (Equity) or H (Hybrid). The next letter(s) is the style. So, BS-bond short, BI-bond intermediate, BL-bond long, BF-flexible, BW-world, BH-high yield. And for Equity, EA-equity aggressive, EC-equity contrary, EG-equity gold (precious metals), ESC-small cap, EMC-mid cap, ELC-large cap, EW-world, EGI-growth/income, ERE-real estate, EV-value. Columns 4-8 shows percentage returns for the periods shown (12 months, 9, 6, 3, and 1 month). Column 9 is V (volatility); a measure of risk; the lower the V, the less risk. Column 10 is the NAV. Column 11 is the C (comet) ranking. C is the risk-adjusted (V) relative performance (CS). The higher the C indicates the most return for the amount of risk taken.

Generally, our ETF strategy is to own the top ranked ETFs (shown in green) and avoid or short the lower ranked ETFs (shown in red).

SLM Bond Timing Model

The SLM Bond Timing Model is based on the expected direction of the Corporate Bond market. The green bars are bullish (expect higher prices and lower yields) and the red bars are bearish (expect lower prices and higher yields). White spaces indicate that the previous signal is still in effect.

WEEKLY REVIEW

- 12/9 Bonds may be at a cross road. If the Fed announces its tapering program, presumably bonds will sell off quickly and sharply. If it doesn't, they should rally for a bit longer.
- 12/2 No changes.
- 11/25 Will look to reenter a bond position as noted on page 2.
- 11/18 Bonds are retracing some of their oversold condition. Yellen's speech reaffirmed the possibility that tapering will be pushed out into 2014. So, bonds are rallying, but the underlying fundamental news appears to be suggesting that the top is in place.
- 11/11 Bonds have sold off sharply the last few weeks on better economic news (leading economic indicators up and employment gains). Talk of Fed tapering has picked up.
- 11/4 Will watch for reentry points on pullbacks to recent trend line.
- 10/28 Taking some profits, as the market looks extended and toppy, but will look to reenter on pullbacks.
- 10/21 Rally still on, as market starts to focus on new Chairman Yellen policies to maintain accommodative Fed.

Income Charts (DAILY)

LQD—-Investment Grade Corporate

12/9 No changes.

11/2 No changes.

11/25 No change here.

11/18 Still on the sidelines.

11/11 Watch for entry points.

11/4 No changes.

10/28 Short-term pause and pullback expected.

AGG—Aggregate Bond Market

12/9 Buy as noted on page 2.

11/2 No changes.

11/25 Looking to buy AGG on the pullback.

11/18 Holding off.

11/11 Watch for entry points.

11/4 No changes.

10/28 Short-term top expected.

10/21 No changes.

10/14 No changes.

JNK—-hi-yield bonds

12/9 No changes.

12/2 Missed the pullback (circled area), I had thought it would be deeper. Won't chase here.

11/25 No changes.

11/18 No changes.

11/11 Pulling back.

11/4 Watch for pullback on which to buy.

10/28 Short-term pause expected.

PCY—--International Bonds

12/9 Buy as shown on page 2.

12/2 Not shown is today's action (Monday). The price has dipped below the 3 pullbacks. Stops are being taken out. So watch for a reversal from here. See page 2.

11/25 No changes.

Each chart shows daily (or weekly if noted in page title at top) prices, a moving average (smoothed green line on price portion), and blue or green spikes. The spikes show potential buy signals. The red lines are price channels. The charts do not show sell signals.

WEEKLY REVIEW

12/9 No changes. The stop is 9% away, so the 'window to buy' is closed.

12/2 No changes. See page 11.

11/25 No portfolio changes. I still expect to continue to accumulate on pullbacks with the expectation thereafter of higher prices. On the other hand, the portfolio may go back 100% to cash on one of two events. It may either be stopped out, at roughly 8% lower prices. Or the timing model itself may signal sell.

[Corrected information on 11/18 buy from 1% to 0.5%.]

11/18 Given that things are in gear, I will redeploy some of the cash into the positions. I am buying 0.5% in each, which is about 5% of the total portfolio. As well, the difference between where the portfolios is and its sell stop has narrowed to 6% from 9% over the last couple weeks. No other changes.

	2010	2011	2012	ytd 2013	Incptn	SD
ETF Growth Portfolio	8.1%	6.9	-2.1	24.5	40.8	7.9
World Growth Index	17.2%	-4.2	14.3	27.4	63.5	15.1

The ETF Growth Portfolio changed as of 12/10/12. It is following the new World Growth Model (WGM), which uses the same 5 etfs (EEM, EFA, IWM, QQQ, SPY) as the World Growth Index (WGI). The difference between the two is WGM uses timing and WGI is always fully invested and WGI is rebalanced to 20% in each position daily (this accounts for the different returns when WGM is invested and held).

Based on the successful back testing strategy, C-lect 5 was added to the portfolio on 9/23/13.

Returns are of previous years, year to date (ytd), and from inception (incptn). It also shows standard deviation (SD).

This page and the next three show the equity ETF database rankings from high to low based on C. C is Comet, which is the risk-adjusted relative performance; the higher the C ranking, the better. Comet, not stars, because comets come into and out of prominence over time.

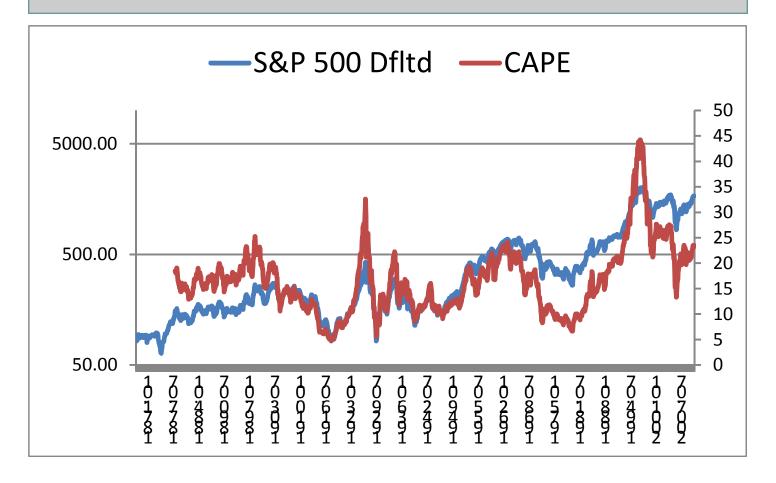

The first column shows the name. The second column shows the symbol. The third column shows the style; it begins with E for Equity and then the style (A is aggressive, W is world, WR is world regional, SC is small cap, MC is mid cap, LC is large cap, GI is growth/income, V is value). The fourth column shows the C level.

CAPE

This is the deflated S&P 500 price and CAPE (cyclically adjusted 10-year PE ratio). Both are adjusted for inflation.

As you can see, whenever CAPE exceeds the 22 area, stocks are poised for a decline. CAPE is currently at 25.5.

Overflow from Page 1, Definitions, and Newsletter Updates

(Continued from page 1) REVIEW

may rally here, but shouldn't get back to new highs (new rate lows). Those days are behind us, especially given the stronger current economic numbers. Plus the leading economic numbers continue to trend higher. Except for bounces, the primary secular trend is up for interest rates and down for bond prices.

As for stocks, they rallied on the positive economic news. The question here is whether this good news is factored in or not? With a PE (12-month as reported earnings) of 20 and a CAPE of 25 (10-year deflated averaged earnings, see page 11), the market is clearly anticipating good news. It

looks to be factored in already. CAPE was higher in 1929 and in 2000, but we know what happened next in those instances.

There is one possibility, however, where things "stay the same". If the economy begins to substantially accelerate its growth rate, then the overvaluation may subside without a corresponding plunge in stock prices. The "E" part of the ratio may improve, rather than the "P" part plunge.

So, those are a couple of scenarios to keep in mind in the next couple months.

Please see the individual portfolio pages for any updates and changes.

Just to clarify a couple of terms that I use regularly.

Short-term is days to weeks.

Intermediate-term is weeks to months.

Long-term is months to years.

Cyclical is 1-5 years.

Secular is 5 years to decades.

Bull market is a series of higher highs and higher lows.

Bear market is a series of lower lows and lower highs.

Neutral market is sideways without a discernible pattern.

Oddly, bull and bear markets may occur simultaneously, but only over different time periods. For example, we may be in a secular bear market, but there are cyclical bull and bear markets within that.

Closing stops are "mental". I look at the position at quarter to the close. If it is trading below the stop (or above if short), then I act with the assumption the security will trigger that closing stop on that day. I sell (or cover) at the close that day.

Portfolio stops for the World Growth Model are internally maintained; they are based on the World Growth Index, not the individual ETFs. Stops will be emailed when close or if triggered.

12/9 No changes.

12/2 As mentioned on page 11, a top test timing model is being constructed. This would be more timely than a trend-following approach.

11/25 No newsletter changes.

11/18 No newsletter changes.

11/11 No changes.

11/4 No changes.

10/28 No changes.

10/21 Work continues on the "shorting/inverse" portfolio and will begin on the new World Income Index (WII).

10/15 Again to clarify, the equity ETF rankings shown on pages 7-10 are now based on weekly C data. The bond ETF rankings are still based on monthly C data.

Plans are underway to investigate a new bond model based on a similar approach as the World Growth Index.

VTI and World Growth Index (reiteration)

The chart shows VTI and WGI from 5/1/2003 to the present. VTI is the Vanguard Total Stock Market ETF. It has less than 2% in non-domestic stocks. It is designed to mimic the US market. WGI is the World Growth Index that is made up of 20% each in EEM, EFA, IWM, QQQ, SPY.

As you can see, the two series track each other fairly closely, but because of the international component the WGI has periods of outperformance. The two are recently back in a neck and neck race because the domestic market is currently stronger than the international markets.

Descriptions & Disclosures

PORTFOLIO DESCRIPTIONS (pages 2 and 6)

Our guiding goal is to provide the most return with the least risk consistently over time through bull and bear markets.

Income Portfolio, page2: Uses a proprietary selection methodology on all of the monitored bond-oriented ETFs to pick the top ETFs. I then use a proprietary timing model to decide whether to buy, sell, hold, or avoid. From time to time, timing considerations may take precedence over selections; in other words, we may own lower ranked funds because of anticipated timing changes.

Growth Portfolio, page 6: As of 12/10/12, it is based on the World Growth Index (WGI), which is made up of a static fully invested 20% in each of five ETFs (EEM, EFA, IWM, QQQ, SPY). The Portfolio will buy and sell the WGI based on proprietary timing signals. On 9/23/13, the new C-lect 5 is also part of this portfolio. It too uses timing.

Both portfolios were started on 1/1/10 with \$100,000. As mentioned, the Growth Portfolio strategy was changed on 12/10/12 to the World Growth Model and again on 9/23/13 to incorporate the C-lect 5 model.

Portfolio changes will usually be made at the close on Monday, unless otherwise noted in any emailed hotline update or triggered stop orders. Issues are normally posted on Mondays by 1:35pm cst (Tuesday if Monday is a holiday, defined as market closed). Portfolios are updated through the Friday close the week before.

Dividends are reinvested in additional shares.

Commissions of \$10 per trade are applied. Interest is currently zero for the money market (cash) position.

SUBSCRIPTIONS: To receive *ETF Selections & Timing*, you may subscribe in one of three ways. You may subscribe on the web site InvestmentST.com using PayPal or call 1-800-800-6563 for Amex, Visa, MasterCard, or Discover orders or send a check to the address on the front page. Subscriptions may be tax deductible.

The recurring monthly subscription is \$24.00. An annual subscription is \$240.00. Subscribers receive this weekly eNewsletter. There is no mailed issue. Subscribers retrieve the current weekly issue at the web site InvestmentST.com by logging in with a user name and password. There may also be emailed Hotline reports sent between issues.

Unless otherwise noted, the weekly eNewsletter is posted by 1:35 PM central time each Monday, except for holidays (closed stock market) and then on Tuesday. It may contain actionable, specific buy or sell advice to take that day at the Monday (or Tuesday) close in each portfolio. We may also use stop orders. For stops, check the ETF at quarter to the close. If it is below (or above) a stop level, assume it will close there and act on that. Portfolio data will be updated through the previous Friday's close. Fund symbols, rather than names, are the official identification used for activity.

GUARANTEE: Subscriptions may be cancelled at any time. Annual subscriptions are refundable for the weekly term remaining with a four-week minimum charge, using a 52-week count. Monthly subscriptions just expire.
