#### Friends and Enemies

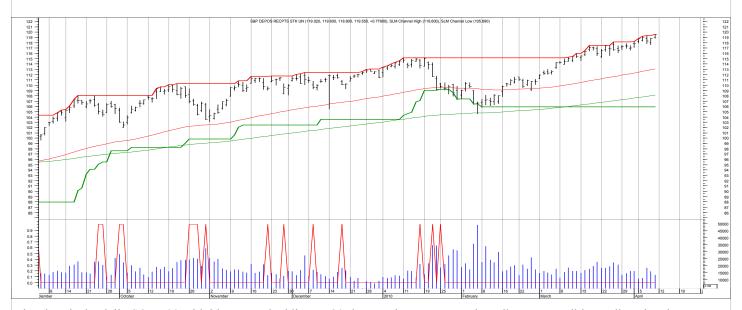

The trend is your friend. Monetary policy is your friend. Government fiscal programs are your friends. These aren't fairweather friends either. They are tried and true friends over decades of stock market history. And they help in up and down markets.

The government's fiscal policy tends to show up less frequently than the other two, but when it kicks in, it can be a powerful motivator.

A trend in place tends to stay in place. This is true whether the trend is up or down. The element of time, however,

will impact this. For example on the chart below, we can see the correction of February. It dipped below its shorter-term 80-day moving average, but remained above its longer dated 200-day moving average. The trend remained up and the mar-

(Continued on bottom right on page 5 see REVIEW)

The chart is the daily S&P 500 with blue smoothed line an 80-day moving average. The spikes are possible trading signals.

### **Income Charts**

PHB—high yield ETF.

Watching for new highs.

TIP—inflation protection ETF.

BSV— short-term bond

Each chart shows daily prices (top portion), volume (bottom portion), a moving average (smoothed line on price portion, and red spikes. The spikes show potential places to buy and sell short. If the moving average is trending down, the spike shows a potential sell short. If the moving average is trending up, the spike shows a potential buy. The charts do not show selling or covering signals.

The two columns to the left show the rankings of the equity oriented ETFs in our database through the previous Friday's close.

These rankings are based on momentum indicators around which we generally want to trade. Our general strategy is to invest with the stronger performing ETFs by investing with the main trend and against the minor trend down. This means that in a bear (down) market, we want to short the funds that rally against their main trend downward. In a bull market, we want to buy during selloffs with the main trend up.

(Continued from page 1) **REVIEW** ket is now at recovery highs.

Monetary policy is also a powerful motivator. The looser the better. The tighter it gets, however, the stock market trends lower.

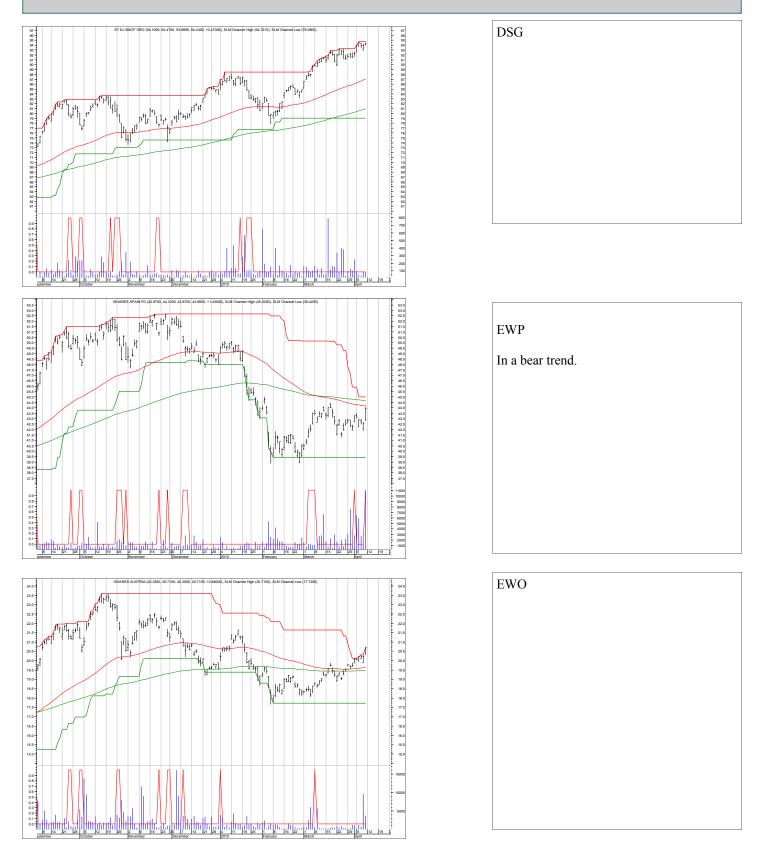

Right now, all three friends are moving the market higher. The trend is up. Fiscal policies are expansive. Federal Reserve policies are loose.

This doesn't mean there won't be corrections, but after those corrections, the market should once again reclaim recovery highs.

Each chart shows daily prices (top portion), volume (bottom portion), a moving average (smoothed blue line on price portion, and red spikes. The spikes show potential buy and sell short signals. If the moving average is trending down, the spike shows a potential sell short. If the moving average is trending up, the spike shows a potential buy. The charts do not show selling or covering signals.

## **Descriptions & Disclosures**

#### **PORTFOLIO DESCRIPTIONS (pages 2 and 3)**

Our guiding goal is to provide the most return with the least risk consistently over time through bull and bear markets.

Income Portfolio, page2: Uses a proprietary selection methodology on all of the monitored bond-oriented ETFs to pick the top ETFs. I then use a proprietary timing model to decide whether to buy, sell, hold, or avoid.

Growth Portfolio, page 3: Uses the same methodologies as in the Income Portfolio, except as it is applied to stock-oriented ETFs.

All portfolios were started on 1/1/10 with \$100,000.

Portfolio changes will usually be made at the close on Monday, unless otherwise noted in any emailed hotline update. Issues are normally posted on Mondays by 1:30pm cst.

Portfolios are updated through the Friday close the week before.

Dividends are reinvested in additional shares. Commissions of \$5/trade and short-term redemption charges, if any, are applied. Interest is zero for the money market (cash) position.

SUBSCRIPTIONS: To receive *ETF Selections & Timing*, you may subscribe in one of three ways. You may subscribe on the web site InvestmentST.com using PayPal or call 1-800-800-6563 for Visa or MasterCard orders or send a check to the address on the front page. Subscriptions may be tax deductible.

The recurring monthly subscription is \$24.00. An annual subscription is \$240.00. Subscribers receive this weekly eNewsletter. There is no mailed issue. Subscribers retrieve the current weekly issue at the web site InvestmentST.com by logging in using a log in name and password.

Unless otherwise noted, the weekly eNewsletter is posted by 1:30 PM central time each Monday, except for holidays and then on Tuesday. It may contain actionable, specific buy or sell advice to take that day at the Monday close in each portfolio. Portfolio data will be updated through the previous Friday's close. Fund symbols, rather than names, are the official identification used for activity.

GUARANTEE: Subscriptions may be cancelled at any time. Annual subscriptions are refundable for the weekly term remaining with a four-week minimum charge, using a 52-week count. Monthly subscriptions just expire.

PUBLISHER: Watercourse Way Holdings, LLC publishes this newsletter.

REPRINTS: This eNewsletter is intended for subscribers only, reprints are not permitted.
